

Neonatal Jaundice Study Day Programme

Jaundice in Darker Skin Tone Babies

Thursday September 26 2024

09:30-16:00

Welcome to the Neonatal Jaundice Study Day Programme, where we delve into a critical aspect of neonatal care: jaundice in babies with darker skin tones. While neonatal jaundice is a common condition, its detection and management can present unique challenges in infants with darker skin tones. This programme explores these challenges, shares best practices, and enhances our collective knowledge.

Preliminary Agenda

Understanding Neonatal Jaundice

Case Studies and Interactive Discussions - Parent Story

Understanding Jaundice in Darker Skin Tone Babies

Cultural Considerations and Communications

Complications and Long-Term Outcomes

Sharing Projects and Strategies that Enhance
Early Detection of Jaundice in At-Risk Populations

Transcutaneous Bilirubinometer by Dräger Rep

Home Phototherapy and Home Serum Bilirubin Testing

Panel Discussions: Equity in Neonatal Care
