

Neonatal Jaundice Study Day Programme

# Jaundice in Darker Skin Tone Babies

Wednesday January 29 2025

09:30-16:30

Welcome to the Neonatal Jaundice Study Day Programme, where we delve into a critical aspect of neonatal care: jaundice in babies with darker skin tones. While neonatal jaundice is a common condition, its detection and management can present unique challenges in infants with darker skin tones. This programme explores these challenges, shares best practices, and enhances our collective knowledge.

## Preliminary Agenda

Understanding Neonatal Jaundice

Interactive Discussions :Parent Story

Understanding Jaundice in Darker Skin Tone Babies

Early Detection through Personalized Care

Cultural Considerations and Communications

Complications and Long-Term Outcomes

Sharing Projects and Strategies that Enhance  
Early Detection of Jaundice in At-Risk Populations

Transcutaneous Bilirubinometer by Dräger Rep

Panel Discussions: Equity in Neonatal Care

H. Gbinigie, Neonatal Consultant, Medway Hospital, Neonatal Clinical Lead, Kent & Medway LMNS
